

Position Title: Preservation Maintenance Intern – 24 weeks

Position Summary:

Nez Perce National Historical Park and Idaho Conservation Corps is recruiting one Trade Skills Intern beginning November through April (24 weeks), 40 hour service weeks Monday through Friday. Internship will focus primarily on the field of historic preservation through application of the Secretary of Interior's Standards for Treatment of Historic Properties in a hands-on project based environment. The intern will be introduced to the preservation ethics and learn assessment and treatment skills necessary for successful historic structure and cultural landscape management and preservation. These skills will be taught through mix of project-based restoration work on park historic structures and cultural landscapes, and through education and mentorship from experienced park staff at a pace that allows for learning and understanding. The program will allow the intern an opportunity to learn, develop, and practice historic preservation trade skills, while gaining an understanding of their utilization and connection to facility management and overall park operations.

Duties and Responsibilities:

Skills and responsibilities include window and door repair, structural and foundation work, roof repair, restoring and replicating historic siding and trim elements, and cultural landscape maintenance (60%). Intern will also be introduced to the National Preservation Act and general section 106 compliance process, conducting condition assessments, preservation work documentation, and the utilization of historic structure reports, cultural landscape reports, and other guiding preservation based documentation (30%). Interns will be required to engage with the local community through organized volunteered opportunities (10%).

Required Qualifications:

- Willingness to learn and participate in a team environment
- Ability to work outdoors in remote settings and inclement weather
- Ability to lift carry 30lbs
- Current driver's license

Duty/Housing Location:

Interns will be required to make their own housing arrangements in the local Lewiston, Idaho area.

Nez Perce National Historical Park, Spalding, Idaho

The 38 units of Nez Perce National Historical Park form a park unit about a people, for all people. It is not one place, but many. It is not one story, but a multitude. It is not one viewpoint, but many more than one. Approximately 300,000 visitors annually come to Nez Perce National Historical Park to experience and understand the cultural heritage and history of the Nez Perce as well as to see the scenery along two national historic trails: the Lewis and Clark National Historic Trail, a unit of the National Park Service, and the Nez Perce (Nee-Me-Poo) National Historic Trail, which is managed by the U.S. Forest Service in close partnership with Nez Perce National Historical Park. The majority of visitors discover Nez Perce sites as they travel to and

from other destinations but are able to discover the many stories and legends inexplicably tied to this landscape.

Spalding Idaho is Park Headquarters for Nez Perce National Historical Park. It is located in NW Idaho near the Idaho Washington border 12 miles SW of Lewiston Idaho on US HWY 95. The area is defined by the Clearwater and Snake rivers as they flow through canyons and steep hills and run together in Lewiston. Vegetation in the area is mostly grass and sage, the topography is rolling hills with distant mountains, much of the area is agricultural and planted in wheat. The towns of Lewiston Idaho population 36,000 and Clarkston Washington population 8,000 offer all major services including rental housing, airport, schools and hospitals. There is no public transportation to the park from the surrounding communities. Daytime temperatures from May to October frequently reach the high 80's with numerous days in July and August with temperatures over 100 degrees Fahrenheit. Daytime temperatures in the winter range from the low 30's to mid 50's. The climate is arid at Spalding which is in the Clearwater river bottom with little rain or snow, both rain and snowfall increase significantly in the higher elevations around Spalding.

Terms of Employment:

This is a full time, 24 week internship. Workload may vary and will require in some instances longer working days and some weekend responsibilities.

Compensation

Intern will receive a stipend of \$13,440 prorated throughout term of internship term.
